Students who complete NSCC's Liberal Arts AA, Dual Language Pathway, can transfer to any one of the following Salem State University programs with full applicability of credit toward graduation requirements. All courses required of the Dual Language Pathway will transfer and will apply to the program as either a major, minor, foreign language, support course requirement or free elective depending on the program.

Notes:

- For programs marked with an asterisk\*, there may be certain caveats. For example, credits will be fully applicable if the student chooses:
  - Sociology, Psychology, or History minor for Dance majors
  - Math or science elective that will apply as a major course or major support course for Biology BS majors. For example - NSCC MAT152 or MAT251, or BIO209, BIO202 or CHE103.

It is strongly recommended that students refer to the degree map for the Salem program as early as possible for these programs to view specific requirements.

- While the Dual Language Pathway courses transfer and are fully applicable to the programs as noted below, students are best advised to complete the **Mass Transfer Pathway** *for some specific programs* for the purposes of ideal course sequencing. (Biology, Chemistry).
